How to Copy a link from Google and Share it on WhatsApp

Note: On a mobile phone the combination is always either a single tap, double tap or a holding your finger on an item to see what menu appears

How to Copy from an open web page on a mobile phone:

- Open the web address you want copied.
- Tap the 3 dots found at the top, right side of the web address.
- Tap on **Copy link**
- Tap on the **central button** found at the very bottom with the soft edged square (may resemble a circle). Tapping this will close this window
- Open **WhatsApp**, either by using the button on the bottom left with the **3 vertical lines** or use a familiar button on screen.

How to paste what you've copied:

- With WhatsApp open, hold your finger within the message part of WhatsApp
- Select **Paste**
